Introduction

Tried and tested, from our 8 years of invoice chasing experience - and having helped businesses chase over \$10BN to date...

We're sharing our top 8 most effective templates!

These templates can be copied and pasted directly, for you to send to customers.

In our experience, personalisation is key in making sure reminders don't get ignored, and customers pay on time!

So, our templates are built from two parts:

- Normal Text
- <Placeholders>

Normal text is outside of brackets, and stays the same across all reminders.

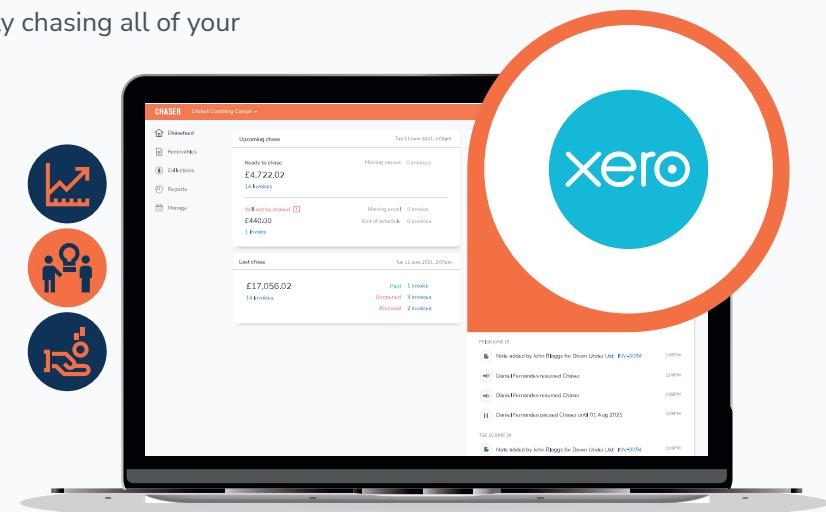

Placeholders are within angle brackets "<>", and signify where adapted text may go, e.g. <our_name> would be replaced with your company's name.

When you sign up for Chaser, these templates are pre-loaded onto your account and placeholder fields are automatically personalised for every recipient.

No more copying and pasting - you can start automatically chasing all of your customers with reminders that look hand-typed!

Preface

Our top 8 templates cover a range of situations - they're made up of:

Single Invoice reminders

Used to chase a single outstanding invoice

Multiple Invoice reminders

When you're chasing one customer for multiple invoices

'Thanks for Paying' messages

Thanking customers for payments. Whilst easily forgotten, we have found this significantly improves future payment times

Placeholder definitions (i.e. the text within angled brackets “< >”)
can be found at the end of the document
